

The sociology of food: eating, diet, and culture, 1992, 150 pages, Stephen Mennell, Anne Murcott, Anneke H. van Otterloo, International Sociological Association, 0803988397, 9780803988392, Sage, 1992

In this comprehensive overview of the sociology of food and eating, the authors demonstrate why the subject has emerged as a significant area of sociological research. Drawing on interdisciplinary sources, the authors explore both the empirical questions raised by the relation of food to inequality, scarcity and famine, and the broader theoretical issue of food as a fundamental item of consumption and a cultural symbol. Topics examined include: B· the relation of food to nutrition and health, and the growth of eating disorders in contemporary societies B· inequalities of consumption by class, gender, age and nation B· the relation of food to the definition of private and public spheres B· historical and anthropological perspectives on culinary cultures B· the impact of food on colonialism and migration B· changing technologies of food production and their social consequences The book will be essential reading for all those wishing to understand the role of food in the contemporary world. It will be of particular interest to students of the sociology and anthropology of culture and consumption and to those engaged in the study of diet and nutrition. The Sociology of Food is also published as a Special Issue of "Current Sociology "(volume 40, issue 2).
